

# Shape poems

Can you make a Shape Poem of a Wind turbine? Find as many words as you can to describe each part, then write them on that section to fit the shape. This is like a List poem - it doesn't have to rhyme if you don't want it to.

On the blades you might choose words like:  
Pointed, white, arrow, whoosh.

On the pillar you might choose words like:  
tall, majestic, strong.

On the nacelle you might choose:  
around, rotate. spin

You might prefer to draw your own shape with the words themselves like this:

*struggling uphill*

*gently lapping waves whispering on the shore*
